

GUI Innovations 'templated Find A ...' applications

Do you have a chain of restaurants, hotels or any other outlets that would benefit from running on Windows mobile devices? GUI Innovations have completely customisable short cut for getting your outlets in front of millions of users.

Windows Phone is rapidly gaining market share world-wide, and Windows 8 tablets have been well received, with over 100m licences sold.

Our 'seed' application can be found in the Windows Phone store and the Windows Store to show you exactly how the applications can work for your company.

What do you get?

Windows Phone

- A 'splash' screen with your own logo and application title
- The ability to specify background, foreground and highlight colours. Additionally, optionally specify a picture background, and choose its opacity.
- A 'start' screen showing the 10 (customisable) nearest locations to your current location. Simply click to see all the locations on a map, get directions, or add it to your favourites.
- A 'choose' screen showing all your locations. Search by initial letter, or search by city, postcode and amenities. The amenities are complete customisable.
- A 'details' screen, showing all the information on the location. Phone or email the location with one click. Visit the web site, pin to your start screen, share on social networks, add to your contacts or view the location on the map.
- A 'map' screen using the full power of Nokia 'Here' mapping. Get directions - driving or walking. Change the map view. Change the aspect or rotate the map. Even get the map to read out the directions to you.
- Voice command. Just say 'find my nearest location', 'find my nearest location with Wi-Fi', or 'drive to my nearest location'. Voice commands can be tailored to any language.
- Augmented Reality maps.
- Support for foreign languages, screen and voice.
- Live tiles showing your nearest location

Nokia Developer Champion

Windows 8 Store

- A 'splash' screen with your own logo and application title
- The ability to specify background, foreground and highlight colours. Additionally specify a picture background, and choose its opacity.
- A 'main' screen showing the 10 (customisable) nearest locations to your current location. These locations, along with your current location are automatically shown on the map. Simply click to get directions, or add it to your favourites. Double-tap on an icon to get more details, or click on the item to get more details.
- A 'details' screen, showing all the information on the location. Email the location with one click.
- A 'search' screen – simply start typing and the standard search screen opens, allowing you to search by city or postcode.
- An 'advanced' search screen - Search by initial letter, or search by city, postcode and amenities. The amenities are completely customisable.
- Use the 'share' charm to share details of the location with your friends.
- Use the power of mapping to get directions, change the map view, and show traffic situations.
- Support for foreign languages
- Live tiles showing your nearest location

What features can be customised?

- Background Colour / Image
- Application title
- Any caption, menu caption or label
- Foreground Colour
- Logo (Plus associated logo for the Store)
- Highlight Colour
- The default email address if location doesn't have its own
- The descriptions for the 8 flags on your data
- The default website if location doesn't have its own

What data do I need to provide?

As little or as much as possible – but more is better. The default fields are:-

- ID
- Group
- Name
- Address 1
- Address 2
- Address 3
- City
- Postcode
- Phone
- Opening hours
- Latitude
- Longitude
- Web site *
- Email *
- SMS Phone number
- Notes
- 8 Flags – descriptions customisable as above. Examples would be Wi-Fi, Disabled access etc.

This file is supplied to us as a csv file, and we take care of the conversions. Users are automatically informed of any updates to the file, and can download the new versions (there is an annual maintenance charge for this).

After supplying us with your data, your applications can be in the stores within a couple of days!

Why should we use GUI Innovations?

GUI Innovations have been working on mobile development for the past 15 years plus. Our Managing Director is a Microsoft MVP and also a Nokia Developer champion. They have been working with Windows Phone and Windows 8 from the very beginning, working on the beta-test program for both Windows Phone and Windows 8.

GUI Innovations have been training developers on Windows Phone for the past 3 years, working for both Microsoft and Nokia as trainers.

The 'seed' applications are already written and published in the stores. GUI Innovations will simply use the data you supply to create new applications, submit them to the stores, and your new applications will appear.

What would my applications look like?
